P. 1200 . 1400 . 1600 . 1800

Technical data

The heights under the top are 615mm min and 1280mm max
 Available dimensions: P= 800mm L=1200-1400-1600-1800mm
 Step continuous adjustment
 Adjustment with up & down button keyboard as standard
 10000 certified cycles of use
 Lifiable weight up to 80 kilos (800N)
 Mechanisms pre-assembled at the origin and motors integrated in the individual legs, plug & play
 Up & down speed equal to 38mm / sec.

Improving the health and welfare of our employees is one of the goals we set ourselves for this year. From this idea we produced ELEVATE, a sit-stand desk system that in a few seconds will change the working sitting position to standing.
 The ELEVATE system, both in the centered and off-set versions, is composed of two 3 levels adjustable legs that hide inside them two motors that regulate the desk from a minimum of 615 mm to a maximum of 1280mm.
 The lifting mechanism is supplied pre-assembled and motors are integrated directly in the leg with a plug & play system. This ensures, in addition to improved stability in elevation even a greater durability.
 The lifting movement is controlled by a UP & DOWN keyboard applied, directly, below the working top.
 To improve our services we offer a warranty and service for control box and columns of the system (Terms of warranty and service to be requested to the sales office).
 The available colors for this product are the standard white and aluminum.
